

# COURSE SYLLABUS

## Forest Resources

Credits: 02 (Lectures 02 – Practice 0 – Self-study 06) Code: MT02007

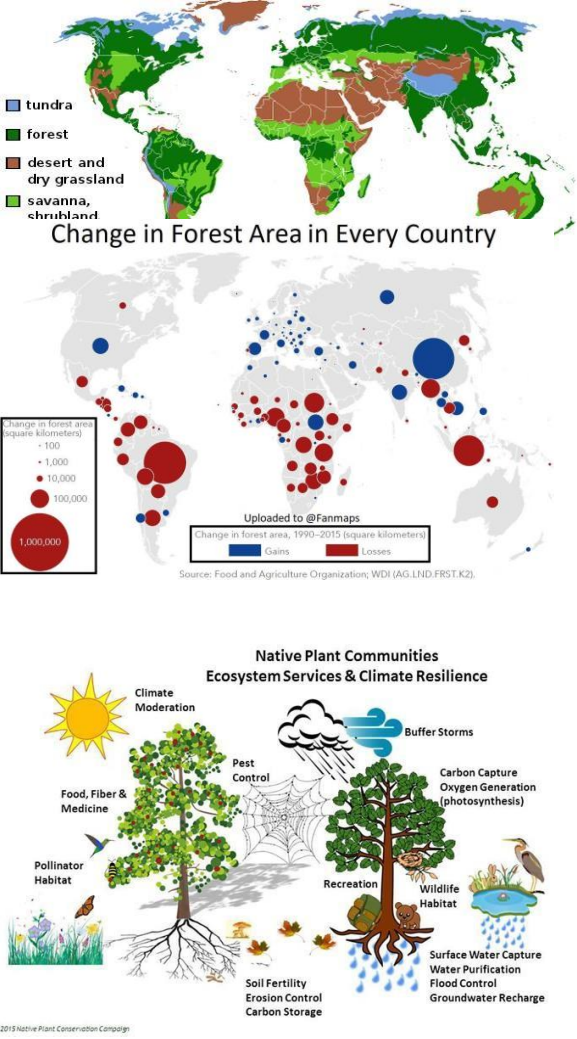

### Expected learning outcomes

Indicator or	Upon the completion of the course, student able to	Expected learning outcomes of program
<b>Knowledge</b>		
CELO1	Describe the characteristics of forest biological resources; mutual relationship among forest components; structure and ecological cycles of tropical forests; some forest classification methods.	ELO3: Evaluate the impact of natural resource exploitation and emissions on environmental quality.
CELO2	Analyze current situation of forest resources in the world and in Vietnam and point out the causes of forest degradation and deforestation and its environmental consequences.	ELO3: Evaluate the impact of natural resource exploitation and emissions on environmental quality.
CELO3	Understanding the current policies and measures related to sustainable forest management and development.	ELO4: Develop sustainable solutions for the management and protection of the environment and natural resources based on different perspectives of natural science, social science, and humanities.
CELO4	Describe the forest ecological and environmental services; policies related to Pay for Environmental Services in Vietnam (PES).	ELO4: Develop sustainable solutions for the management and protection of the environment and natural resources based on different perspectives of natural science, social science, and humanities.
<b>Skills</b>		
CELO5	Participate in group discussion on forest resource management topics.	ELO7: Work in groups and lead multi-functional teams effectively.
<b>Attitude</b>		
CELO6	Strictly follow the university's regulations in learning, having positive attitude toward forest resources management.	ELO12: Demonstrate ethical standards of the profession, carrying out the responsibility of environmental protection and serving the sustainable development of Vietnam and the world.

### Brief descriptions

- Chapter 1: Introduction to forest and forest resources
- Chapter 2: Classification of forest in temperate, tropical regions and in Vietnam
- Chapter 3: Current situation of forest resources in the world and in Vietnam
- Chapter 4: Sustainable management and development of forest resources
- Chapter 5: Ecological and environmental services of forest

### Learning methods

- Self-study: read class materials, complete assignments.
- Participate in group discussions and other class activities.
- Attend the class or via Microsoft Teams and E-learning (<http://elearning.vnua.edu.vn>)
- Explore online and other learning material resources for the course.

### Assessment methods

- Band score: 10
- In which: progress evaluation 50%, final exam 50%

Participation and short questions (10%)	Group discussion (20%)	Midterm exam (20%)	Final exam (50%)
---	------------------------	--------------------	------------------

### Student tasks

- Attendance: Students must attend at least 75% of the class and participate in class activities.
- Self-study: read and review the learning materials provided by lecturers through e-learning; participate the group discussions under the instruction by lecturers.
- Assessment: Participate in group discussion, complete midterm exam and final exam.
