

CURRICULUM VITAE

<p>Name. Nguyen Thi Lam Doan</p> <p>Address: Vietnam National University of Agriculture, Trau Quy, GiaLam, Hanoi, Vietnam</p> <p>Phone: 0084.776382289 Fax: 0084-438276554 E-mail: nlddoan@vnua.edu.vn</p>	
--	--

Educations

<i>Degree</i>	<i>University</i>	<i>Specialization</i>	<i>years</i>
PhD	Department of Biochemistry, physiology and microbiology, Gent University, Belgium	Biochemistry and Biotechnology	2008-2012
Master	Vrije Universiteit Brussel and Leuven university, Belgium	Molecular Biology	2003-2005
Bachelor	Hanoi University of Science, Vietnam national University	Biology	1995-1999

Work experiences

<i>Duration</i>	<i>Place</i>	<i>Responsibility</i>	<i>Address</i>
5/2001 - 9/2003	Department Biochemistry and Nutrition, Faculty of Food Science and Technology	Lecturer	TrauQuy - GiaLam - HaNoi
10/2003 -	Vrije Universiteit Brussels (VUB) and	Master student	Belgium

9/2005	Leuven University		
10/2005 - 9/2008	Department of Biochemistry and Food Biotechnology, Faculty of Food science and Technology, Hanoi University of Agriculture	Lecturer	TrauQuy – GiaLam - HaNoi
10/2008 – 6/2012	Ghent University	PhD student	Ghent, Belgium
7/2012- 12/2014	Department of Biochemistry and Food Biotechnology, Faculty of food science and technology, Vietnam National University of Agriculture	Lecturer	TrauQuy – GiaLam - HaNoi
1/2015 To now	Department of Biochemistry and Food Biotechnology, Faculty of food science and technology, Vietnam National University of Agriculture	Lecturer, Vice dean of Department	TrauQuy – GiaLam - HaNoi

Teaching responsibilities

Courses for undergraduate programs:

General Biochemistry, Food Biotechnology, Enzyme Technology

Courses for master programs: Advanced Biochemistry and Food Biotechnology, Food contaminant analysis, Post Harvest Biotechnology

Research areas

- Researching diversity of microorganisms by using methods: (GTG)₅-PCR fingerprinting, MALDI-TOF mass spectrometry, multilocus sequencing analysis (*pheS* gene and *rpoA* gene sequencing analysis and 16S rRNA gene sequencing, DNA – DNA Hybridization, DGGE (denature gradient gel electrophoresis).

- Applications of microorganism (starter culture) in fermented food products

- Production of microbiological products such as probiotic used in food and in livestock
- Application of biological organisms in the treatment environment
- Enzyme extraction such as protease, amylase, cellulase, β - galactosidase ... from microorganisms
- Isolation, selection of food grade bacteria producing antimicrobial peptides, enzyme and application them in foods

Projects

<i>Project titles</i>	<i>Duration</i>	<i>Sponsor</i>
Leader of projects		
Studying and using hydrogen peroxide to preservation fresh milk	2006	Hanoi Agricultural University
Studying of thermal pasteurization to fresh milk	2007	Hanoi Agricultural University
Studying and selecting of lactic acid bacteria for producing starter culture for fermented food	2009-2010	Ministry of Education and Training
Member of projects		
Collected studying thermosetting α – amylase from microorganism and applying them in food processing	2006-2007	Ministry of Education and Training
Studying and selecting of enzyme β -D-fructofuranosidase from microorganism and applying for functional Fructoolygosachharide (FOS) production	2007-2008	Ministry of Education and Training
The selection of microorganisms to synthesize enzyme Chitosanase for functional Chitosanoligosaccharide production	2008-2009	Ministry of Education and Training

Studying and selecting of lactic acid bacteria for producing starter culture for fermented food	2009-2010	Ministry of Education and Training
Screening, characterization and production of antimicrobial peptides produced by Gras (generally recognized as safe) bacteria from Vietnamese fermented food	2015- 2017	Project of Vietnamese – Belgium, Vietnam National University of Agriculture
Beta – galactosidase of food grade bacteria: from screening to production and preliminary Application	2017-2018	Project of Vietnamese – Belgium, Vietnam National University of Agriculture
Application of microbiological technology in reduction of histamin content of traditional fish sources	2018 - 2010	Ministry of industry and trade of the socialist republic of Vietnam
Effect of heat treatment on concentration of beta casomorphins in A1A1 and A2A2 milk and in their digests following in vitrosimulated-gastro intestinal digestion	2018 - 2021	National Foundation for Science and technology Development (Nafosted)
Study on ripening mechanism and its application to extend the shelf-life of avocado after harvest	2018 - 2021	Nafosted

Publications

Journal articles

Duc Doan Nguyen, Vicky Ann Solah, Stuart Keith Johnson, Hoang Anh Nguyen, **Thi Lam Doan Nguyen**, Thi Lan Huong Tran, Thi Khuyen Mai, Francesco Buseti (2019). Identification and quantification of beta-casomorphin peptides naturally yielded in raw milk by liquid chromatography-tandem mass spectrometry. LWT - Food Science and Technology 11, 465 –

Nguyen Thi Lam Doan, Dang Thao Yen Linh, Nguyen Duc Doan (2019). Factors affect to the fermented time, alcohol content and sensory quality of passion fruit kefir product. Science and Technology Journal of Agriculture and Rural Development. 3+4: 164 – 170

Dang Thao Yen Linh, Tran Thi Thu Hang, **Nguyen Thi Lam Doan**, Nguyen Hoang Anh and Nguyen Thi Thanh Thuy (2018). Isolation and screening of Histamine - producing bacteria from the first six months of the Cat Hai fish sauce fermentation process. Vietnam Journal of Agricultural Sciences 1(3): 220-229

Nguyen Thi Lam Doan (2018). Determination thermostable lactic acid bacteria producing antimicrobial compound and extracellular amylase. Science and Technology Journal of Agriculture and Rural Development 24: 54 - 60

Ngo Xuan Manh, **Nguyen Thi Lam Doan**, Vo Nhan Hau, Ngo Xuan Dung (2008). Selection of optimal conditions for *Bacillus licheniformis* (strain BCRP) culture to synthesize thermostable α amilase. Journal of Science and Development. Vol VI, No 5. 460-466

Books

Ngo Xuan Manh, Nguyen Hoang Anh, **Nguyen Thị Lam Doan**, Nguyen Van Lam (2013). Food Biotechnology, Agricultural University Press

Conferences

- Validation of MALDI -TOF MS for rapid classification and identification of lactic acid bacteria from traditional fermented food in Northern Vietnam. Poster for Microbial Diagnostic Applications of Mass Spectrometry, London, UNITED KINGDOM, April 4-5th, 2012.
- Studying of microbiology populations from foods by polymerase chain reaction denaturing gradient gel electrophoresis (PCR- DGGE). Scientific seminar female of Hanoi Agricultural University October, 2012.
- Identification of lactic acid bacteria diversity from a traditional fermented pork meat product by using a combination of culture dependent and independent approach. The 41 congress on science and Technology of Thailand (STT41). Suranaree University of Technology Nakhon Ratchasima, Thailand. November 2015.
- MALDI -TOF MS and (GTG)₅-PCR fingerprinting for classification and identification of lactic acid bacteria from some traditional fermented food in vietnam. Date 12- 14, November. VBFOODNET 2017. NONG LAM UNIVERSITY – HO CHI MINH CITY
- Dang Thao Yen Linh, Tran Thi Thu Hang, Nguyen Thi Lam Doann, Nguyen Hoang Anh, Nguyen Thi Thanh Thuy 06- 07/09 2018. Isolation and Screening histamine - producing bacteria from the first six months of Cat Hai fish sauce fermentation process. Proceedings of Scientific and Technological Conference specialized in Agricultural Mechanics and Post-harvest Technology.
